

23 January 2018

Dear The English School Nicosia,

Many thanks for supporting your students to compete in **Integral's Ritangle competition** during 2017. A team in your school/college submitted the correct answer before the final answer was published. Only around 10% of the 600 teams registered achieved this. Please find enclosed a certificate in recognition of this.

Ritangle is challenging and we devise it to encourage use of problem-solving skills, teamwork, perseverance and good use of technology. By finding the correct answer, students at your school have shown themselves to be very proficient in these areas.

Ritangle will be back in Autumn 2018!

Best wishes,

Dr Richard Lissaman
Mathematics in Education and Industry

Ritangle

Congratulations!

A team from

The English School

successfully solved Ritangle 2017.

Ritangle is a maths competition aimed at teams of 16-18 year old students. Solving Ritangle requires teams to answer a series of challenging maths problems set daily over a two-month period.

Over 650 teams competed in the competition in 2017 with around 10% of the teams successfully solving the entire puzzle.
